Covid

Victoria

What's the COVID-19 situation? Cases are higher than they have been in recent months, but lower than the peak earlier this year. Case numbers appear to have stabilised compared to last week.

Here's what the latest data from the state's weekly surveillance report says:

"The number of people in hospital with COVID-19 remained relatively stable this week with a daily average of 326, up from 325 last week."

"The current average is high compared to recent months but remains below the most recent peak in May/June.

"The 7-day average of ICU patients declined this week (16 to 15)."

"Deaths in the most recent 28-day period have continued to increase, with a current 28-day total of 144."

"A mix of Omicron recombinant XBB sub lineages continue to dominate in Victoria.

"There is currently no evidence of increased severity for XBB subvariants."

A good time was had by all.

At our Christmas Party for members and families.

A special mention to the "Naughty Boys" for organising and cooking.
